1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-13 and 20-32, drawn to a weapon system and associated method of use, classified in class 89, subclass 41.01.
- II. Claims 14-19, drawn to a computer software program for use with a weapon system, classified in class 89, subclass 1.11.
- 2. The inventions are independent or distinct, each from the other because:
- 3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed as evidenced by claims 15 and 32 (Bsp/ABbr). The subcombination has separate utility such as utility absent a software program (hard wired) or with a different type of software program.
- 4. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 5. Applicant is advised that the reply to this requirement to be complete **must include an** election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen M. Johnson whose telephone number is 571-272-6877
